ifm Introduces Stainless Steel Metal Face Inductive Sensors for Food and Beverage Applications

EXTON, PA – ifm efector inc., a leading manufacturer of sensors and controls, introduces a new line of sensors and cordsets designed and priced for food and beverage applications. The new 316 stainless steel, metal face sensor line is designed and tested to provide reliable position indication in harsh food and beverage applications. Starting at \$61.00, ifm's stainless steel sensors offer the best value in the market, providing all of the benefits of a stainless steel, metal face sensor at a low price point.

Designed and tested for use in high temperature (0° to 100°C) food and beverage applications, the sensor line is designed and tested to withstand extreme environments. The sensor's housing is chemically-compatible with industrial cleaning solutions and will not corrode. Its zero-leak design, rated IP69K, prevents ingress during high-pressure cleaning and steam cleaning.

To improve their life-in-application, the sensors are subjected to a battery of tests that insure reliable performance in the application. These tests include the IP69K high pressure cleaning test, thermal shock test, and shock and vibration tests.

ifm stainless steel sensors feature 360° ring LED design for status indication and laser-etched part numbers. Sensors are available in standard housing styles that include M12, M18, and M30 tubular housings. Prices are \$61.00, \$63.00, and \$66.00 (US), respectively.

for Food and Beverage Applications

For power connection, ifm offers a family of M12 Micro DC cordsets specifically designed for food and beverage applications that feature PVC cable material rated for high temperatures, stainless steel coupling nuts and gold contacts. Cable lengths are available in 5, 10 and 25 meters. Prices start at \$14.00 (US).

For more information about the stainless steel, metal face product line, call 800-441-8246 or visit www.ifm.com/us. Contact: ifm efector inc., 782 Springdale Drive, Exton, PA 19341. Tel: 800-441-8246 • Fax: 800-329-0436 • Website: www.ifm.com/us.

ifm efector inc. is a premier technology partner for sensors and controls. Products include proximity switches, photoelectric sensors, fiber optics, condition monitors, speed monitors, pressure sensors, flow sensors, temperature sensors, level sensors, valve position sensors, mobile control solutions, ID systems, AS-i networking and Safety at Work products.
